

BULLETIN
OF
AICHI UNIVERSITY OF EDUCATION

Vol. LXXI

March 2022

Natural Sciences

Contents

Kunio ICHINOBE : A Remark of k -summability of Divergent Solutions to Some Linear Partial Differential Equations with Entire Cauchy Data	1
Yukihiro HASHIMOTO : Morphism Approach to Tonality	8
Taichi YASUMOTO : Use of Contactless Smart Cards for Education in Computer Sciences	17
Shinji FUKUI : Development of Control System of Robot Car for Programming Education Using Scratch 3.0	24
Yoshiaki TOYA : Study of Improving Teaching Materials for the Delivery Practice of Chemistry Experiments Demonstration of Chemical Magic “Sudden Disappearance –Magic Cotton–,” etc.	30
Junichi HIRANO, Tatsuhiko ADACHI and Tsutomu IWAYAMA : Development and Practice of Ionization Tendency Card Game Teaching Materials in High School Chemistry Basics	37
Yuya KOHKETSU, Mizuki MOCHIZUKI and Masashi OSA : Synthesis of a Photosensitive Polymer as a Chemistry Educational Material and an Investigation of its Photochemical Reaction	43
Hirofumi NAKANO : Reaction of Monosodium Glutamate in Water using a Closed Vessel Reactor: Improvement of the Organic Chemistry Experiment in Cambodian High School by Using Cambodian Materials. Part 3.	52
Mayu KAKUNO and Hiroyuki HOSHI : Using Outdoor Rocks in School as Teaching Materials for Weathering: Practice in an Elementary School and Examination of the Educational Effects	59
Yurina OGAWA and Takahiko MIYAKAWA : Nonlinear Dynamics of Interacting Rotatable Bar Magnets	67
Takashi IWAMATSU : Growth of the Medaka (VIII)—Development of Pharyngeal Bones with Teeth during Metamorphosis.	75
Ai KAWAMURA and Yoshinari KAWAMURA : Learning of Vertebrate Evolution Using Natural History Museums: An Attempt to Improve Earth Science and Biology Education in Educational Universities and Faculties	82
Osami HABUCHI : Formation of a Highly Sulfated Nonreducing Terminal Sequence in Chondroitin Sulfate by Concerted Reactions of GalNAc 4-Sulfate 6- <i>O</i> -Sulfotransferase and Uronyl 2- <i>O</i> -Sulfotransferase	90
